vitrogres

Vitrogres is an environmentally committed company.

The glass we use as raw material comes from manufacturing surpluses from the glass industry and is 100% recyclable.

We do not use water as part of our productive process.

We use state-of-the-art machinery and electric kilns that do not generate any waste products or pollutant gases.

All our packaging is made with recycled cardboard.

Why choose Vitrogres for your swimming pool?

- It is the flattest, cleanest and most perfect mosaic in the market. Its joints are only 2 mm wide, letting the mosaic assume the main role.
- It is a non porous material with 0% absorption, resistant to chemical agents and totally inalterable over time.
- It is an ecological and environmentally friendly material.
- Easy to install and virtually maintenance free
- The size of tiles allows a perfect fit to any surface, flat or curved, guaranteeing excellent and lasting results
- Tiles are specially designed to walk over them barefoot. Edges and corners are carefully treated to eliminate any risk of abrasions or cuts.
- It is a non slip material (B and N3 finishes) and complies with current safety regulations verified through technical testing by internationally recognised laboratories.
- Easy to clean and totally hygienic and anti-allergenic, these mosaics do not absorb any humidity, preventing the growth of fungi and bacteria.
- It offers an endless combination of colours, textures, formats, finishes.

What can offer Vitrogres for your swimming pool?

- The most complete range of colours for swimming pools: blues, dark blues, etc...

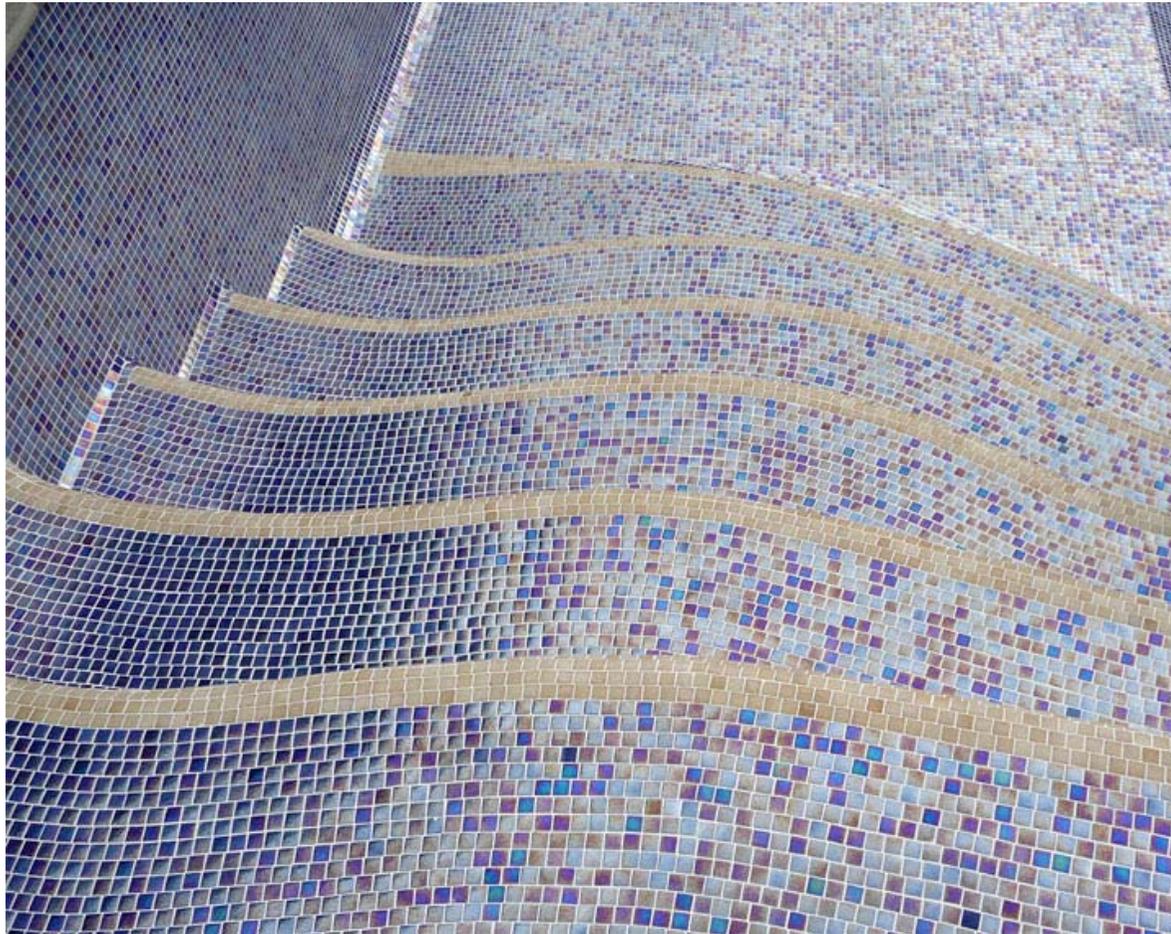

- Different finishes: matt, plain colours, shaded

- You can have a special swimming pool with different tiles formats: 25x25, 40x40, hexagonal, round format
- We have anti-slip with all the technical specifications in all colours and formats
- We can produce all the special decorations you can imagine, all the images, murals, borders, etc...
